

NAYELY RODARTE

Frontend Developer

📍 Mexico City

About me

Lawyer by training but programmer at heart, I found my passion for web development around mid-2019. As a self taught developer, I love to learn new skills on an on-going basis by building my own projects to get a sense of real life situations.

I'm also a proud member of [Technolatinas](#) and [Café con Ingenieras](#), communities that inspire women to pursue and thrive in tech related careers in México and LATAM.

Educational background

University of Chihuahua

Faculty of Law | Chihuahua, Mexico

2009 - 2013

Centraal Academy Bootcamp

Fullstack Developer Program | Mexico City

May - Aug 2019

Projects

Skintracker

My first fullstack application, which also was the final project for Centraal Academy's bootcamp. I used vanilla JavaScript and CSS for the frontend.

Wedding Digital Invitation

A freelance fullstack project of a digital invitation with a RSVP form I built using React.js with Hooks for the frontend.

Laura Accesorios Shopify Store

A freelance project for a local jewelry store in Texas on which I customized a Shopify template using Liquid, Sass and implemented Theme Kit.
